---

**Part of the greatest Byzantine monuments in Greece,** route connecting the region of "Plataniti" with the region of "Korinthos".

**It is a single-spaced, cross-shaped, domed church, which has also practiced ancient construction techniques.**

There is a reservation of [Map](#) for this church. It is a small, ancient stone building with a domed roof and a cross on the front facade. The church is situated on a paved area, and there are some small plants growing in front of it. The sky is clear and blue.
