The building was built in 1958 and replaced in 1988. The building is located at the intersection of the main road and the road to the right. The building is a three-story structure with a red-tiled roof and white trim. The building has multiple windows with red frames and a central entrance. To the right, there are palm trees and other buildings in the background. The square is paved with cobblestones and features several black lampposts. A small tree is planted in a planter box near the building's entrance.
